Regarding: State of Idaho Comments to the 4th Draft of the Monsanto Feasibility Study and
Stochastic Risk Assessment.

Dear Mr. Brincefield:

We are in the process of reviewing the current Feasibility Study in light of the Risk Assessment work completed by Monsanto and EPA. At this time we believe there is sufficient information available to make a remedy selection and will submit no additional comments. We do appreciate the opportunity to review and respond and look forward to the May 14, 1996 meeting with the EPA and Monsanto.

Regards

Gordon Brown
Remediation Project Officer
